Education

Benha University, Bachelor's 

2020 – 2024

Faculty of Science | Computer Science Department

Qalyubia, Egypt

Profile

I am an experienced front-end developer with a strong command of HTML, CSS, and JavaScript, as well as expertise in React and Git. I have a Bachelor's degree in Computer Science and a proven track record of delivering high-quality projects, I am dedicated to staying updated with the latest technologies and frameworks to improve my innovation and efficiency. My previous accomplishments include working on projects such as road improvement sites and company management. I am eager to contribute my skills to a dynamic team and continue expanding my knowledge in computational sciences.

Professional Experience

Frontend Developer, Micro Engineering 

08/2023 – present

Cairo, Egypt

- As a Front-end Developer at Micro Engineering, I am responsible for creating and maintaining visually appealing and user-friendly websites. My role involves utilizing HTML, CSS, JavaScript, and React to develop dynamic and interactive web interfaces that enhance user experience.
- I Apply best practices for front-end development to ensure cross-browser compatibility and optimal performance.
- I Collaborate with cross-functional teams to integrate new features and functionality into web applications.

Projects

Van_Life 

GitHub Link 

Introduction to the project:

This project helps people know a lot of information about vans, such as their types and car rental prices. It allows people to rent vans and gives each user a personal dashboard page for each van to identify

- Gains in the last month
- Van rating out of 5
- Know the vans available for rent

The site supports separate pages to explain winnings and many other services

Tools & features:

HTML | CSS | JavaScript | React.js | React Router V6.4 | Material UI | React Icons | mirage.js | Vite

e-commerce [🔗](#)

Introduction to the project:

The website is designed to display and sell products. The site has a simple user interface and the site was designed with **React** technology, which provides ease of browsing and speed of use. The site has separate pages to display all the details of the product you like. Also, if you buy any product, it is automatically added to the cart page, which contains a picture, price, and the number of pieces you want for each product, and you can simply purchase the product from that page.

Tools & Features:

HTML | CSS | JavaScript | React.js | React Router | Bootstrap | Redux

Weather [🔗](#)

GitHub Link [🔗](#)

Introduction to the project:

The site is specifically designed to know weather conditions around the world and has an easy-to-use interface. The site asks the user for permission to access his personal location in order to give him the weather for his location directly and quickly. He can also search for any place in the world to know its weather and time as well. There is a final advantage, which is that it gives him a forecast of the weather for three days in the future.

Tools & Features:

HTML | CSS | JavaScript | Google Fonts | API
